city [I notice the word civitas on a car wash sign driving home]

were uncertainty though what my baptismal certificate says as does my birth certificate

regarding celestial beginnings I may or may not be convinced

the axiology of being convinced may be verbal upon [their] enlightenment

and I

my own upon an experiential properties including [their] enlightenment and

presentation

trope is interest in social regards including an interpretation of an audience which are presented to

*my goodness*

[fuck] were the clamor at a dented vehicle

the small parking lot and a mindless movements of hardware store exitees carrying

screws and

hardware like garden boards and nails and cement and

the thing about goodness is

profanity were profanity [my goodness] is mine

at having dropped a brick upon my toe however

hers was hers [my goodness] at her vehicular indentation and

were she a kindergarten teacher and

were he the airplane flight miss-er to say [my goodness] to sleep in an airport twelve hours because

the [oh my stars woman] kindergarten teacher was in a position to withhold the [f] word until [they]

reached high school and knew

better than teachers anyway

goodness and the varieties of goodness may or may not be debatable however

to say [my goodness] is to say mine and who could contest such language though

the weary traveler wrapped in a blanket at the bus station as well though

one looking on [my goodness] [my own]

*old lady orchard*

pagan

like the nesthead human being of trees forest trees  
symbiont of spiders in his treehouse for the lesser gnats and gnoceum gnocei

an orchard is unique from a forest and  
were apples from a single prairie tree bywhich seeds into a turned soil  
an orchard is rows

[and were she saying forest when orchard]

*easter*

april seventeen  
sunrise  
and south the farmland turned over  
seven thirty am mass

waiting for chocolate since mardi gras

the girl scout cookies in my freezer  
thin mints

and a country drive home

first buds the landscaped bushes  
first buds the natural nature exterior to landscaping  
in two weeks  
leaves and springtime as visual history has presented itself every year

come summer again I expect

easter is renewal  
biblically were jesus' return  
naturally the season is a metaphor for renewal  
the cycle of the seasons will close again in november and

what can be said of age and seventy six easters and  
what can be said of age and one hundred easters

a country drive nor leaves appears as november  
and forty degrees fahrenheit today same as november  
a turned soil nor sprouted I know for the snow ended one month ago

nor green and botanical  
[country road pb] [easter]

folk music

an acoustic guitar to poetry

and banjo and harpsichord and drums to cottondressed socially concerned women and breadfactory men from unions and dustbowls that walk to work and may or may not have electricity in their own homes nor plumbing though know how to turn on a light switch

folk music to an audience is music and encouraging the most recent spirit the ongoing spirit

other musicians called rock musicians with electric instruments nor a poetic insight nor local relevance

folk singer bob dylan plugs in his acoustic guitar though adopts an electric guitar for his same music

the first folk musician to play folk on an electric guitar

and a mixed sentiment from an audience

*a philosophy of primates: instrumentalism*

I write in fine point because of the importance of the subject  
 a stick poked into an ant hill will yield ten ants  
 a cigarette being smoked by a primate will last exactly six minutes in an arid environment  
 a photograph taking primate with camera may yield one 'keeper' photograph of fifteen photographs taken

the writing instrument of choice

*prussia and social security*

otto von bismarck

an idea

a citizens pay a percentage of their income to be collected by a governing body

at age sixty five a citizens are entitled to an actuarialized living allowance until the day they die

Bis·marck, Otto von| 'biz,märk | Prince of Bismarck, Duke of Lauenburg (1815–98), Prussian minister and German statesman; chancellor of the German Empire 1871–90; also known as the Iron Chancellor; full name Otto Eduard Leopold von Bismarck. He was the driving force behind the unification of Germany, orchestrating wars with Denmark (1864), Austria (1866), and France (1870–1) in order to achieve this end.

hölderlin (b seventeen seventy d eighteen forty three) swabia and switzerland poet may or may not have benefitted from prussia's social security and may have had no opinion as the princeton university press translation of his hymns and fragments and possibly hyperion mentions hölderlin as a bridge between classical and romantic poetry, -tutor and court librarian hourly or salaried employment professional would receive at age sixty five an actuarialized living allowance until the day they die

one hour later I could not locate Prity Gracie

she was cowering near the outdoor air conditioner [in the rain]

I tried to *herd* her indoors and she runs away

I was finally able to lift her and bring her indoors out of the rain

I set a flower pot in front of the screen opening

upon boredom

I would assume

Prity Gracie pushed an opening in the screen  
crawled through the narrow opening and

I observed

nor attempted to attract her attention

she sniffed the evening ground as if she were a canine though she is a feline

she looked at me interior to the screen patio several times and

I made no expression | I looked the other way

Prity Gracie crawled back through the narrow screen opening that she had previously opened and  
continued with her evening

I set a flower pot in front of the screen opening

*natural consequences*

were my own behavioral consideration mentioned in a teacher training program

natural consequences

not in a classroom

a controlled environment

an assigned environment

evaluation including grades subjective assignment grades objective assignment grades end of semester  
grades

formal educational consequences

were formal education natural thus natural cause as a diploma receiving graduating class having been educated in a way enter society at age eighteen with regards to the formal social and controlled assigned environment of their diploma granting N [representing the entire population within a school district a neighborhood a rural community]

students within formal educational environments may be sheltered in a regard in relation to the whole experience of community eg students cannot vote until age eighteen students are not wage earners and are dependent on their parents for shelter and food and clothing

students within formal educational environments are introduced to aspects of community living democratic participation aesthetics such as natural and art appreciation literacy and literature the varieties of mathematics, -students are introduced to lessons in an intentional manner beginning at age five in which lessons are separated, letter recognition word recognition penmanship and reading and interest and writing with interest and speaking conversationally with others of personal interest shared interest as well as an interest / noninterest of a framed painting on a wall, -a separated lessons find their way to more common and comprehensive lessons throughout age eighteen of a kindergarten through twelfth grade formal public education

for a society to consider k-12 natural [teleologically because education is not natural because lessons are separated and defined culminating in an accelerated nature at graduation as *prepared* for nature] [the ends of education kindergarten through twelfth grade is a diploma after which a recent graduate will be exposed as well as cause the same previously and perhaps differently understood nature as the one understood before graduating

natural consequences would not exist within a controlled environment such as a kindergarten through twelfth grade classroom

upon graduation natural consequences may or may not be considered

I do not know territorial practice of turtles

I do not know mating rituals of turtles

I do not know a governing instinct at turtle community gatherings

I do not know a social instinct of turtles

I do not know a defensive instinct of turtles

I do not know an offensive instinct of turtles

I do not know of turtle preferences

perhaps preferences among turtles and those within a fixed geopolitic of an island have been exhausted

I would say turtles do communicate because turtles reproduce

*aquarium snails*

the three inch round circular spiral shelled brown pond variety was five dollars and

live aquarium plants

thirty eight gallon aquarium with electric blue lobster an oscar an elephant nose fish angel fish gold fish frogs clear fish and plecostemos plecostemi

the snail was large and impressive at the pet store

and what do snails eat

snails eat the algae on the glass walls of the aquarium

have miniature snails the size of a pin head grow quickly into one inch size snails grow quickly into two inch size snails and have miniature snails of their own sexually and or asexually

the overpopulation of reproducing snails in a thirty eight gallon aquarium came to mind in my living room as the entire existence of more than one hundred snails of all sizes kept increasing though, of a mind of a wildlife biologist at the time, a question of overpopulation given the environmental constraints of a thirty eight gallon ecosystem

so

I got bored

threw the snails into a lagoon at a nearby river

cleaned the aquarium

bought a beta

went to my mail box at nine pm and stepped on a terrestrial snail with a sound

*following slime tracks and would I eat that which makes slime tracks anyway*

and forward thought is important and

on the origin of species [as an historical consideration]

the ontologic nature is one's curiosity of an history and a gathered and gathering security  
coffee for breakfast

the phylologic nature is security for one's social nature and started with those near to one's own being

an history book is or is not theory and

to regard a methane embryo billions of years past and to act presently in a way

to regard a natural selection as natural to evolution and to act presently in a way

a two if not other theories are not necessarily mutually exclusive

nor biblical thought excluded and to act presently in a way nor poetic thought

the value of fuzz is not contained within the dryer lint variety [eg] exclusively for fuzz in a conversational and or academic sense may or may not be interspersed with white noise

a want for objectivity may or may not be what a listener craves and why a listener continues to listen though much can be said of subjectivity including aesthetics the likes of old typewriters that sit upon a shelf for invited guests to notice and to type upon on occasion

distance without reference to material may originally be considered mathematical though again, scatterplot, pluralism, dewey decimal number, constellational studies including ethnoastronomy, -though a same stars exist in a same location, only metaphor a material as reference to conversational classification, taxonomical classification, though conversation itself may or may not be framed in reference to experience including interpretation of experience, itself with reference to material including place and measurable, -and with respect to other experiences
