exclusively

value for value representatively of course given token for token were identical tokens equal an acquisition of necessary tokens called united states dollars then

given a stores and local currencies eventual a goods are established and a local currencies are replaced with the currency of the larger geopolitic a goods established a consumer market is established with regards to access to what is wanted and available in return the seller would be inclined to offer what they believed to be desirable to the consumer because they would acquire dollars and purchase what they themselves desired

cyclical is the idea that a value is recycled as currency though were there no original dollars to enter the cycle the individual would be exterior to capitalism therefore otherwise inclined regarding dollars as to essential needs such as food shelter and unessential needs
