Thickets atween a walnut trees

The explorer
machete

an undergrowth and dense

a walnut trees are my own backyard
send a green covered walnuts to the earth
to make a sound

an undergrowth

there is a clearing wide enough for a picnic table
wide enough for a tent

where
there can be no spying and the canopy
green midday ambient
allows no lighted sky
green midday ambient

a quiet shuffling of the leaves were a wind

atween a forest for what a forest is called for
atween a walnut trees

a thickets a brambles and with thorns
to say old nor
for never having to have been excavated with a civics for thought

the spanned life of a walnut tree

perennial

the spanned life of undergrowth

deciduous

and blossomed in spring

the formidable
a southerly stop in travel one end to another the forest

and nearby another sorted forest
inwhich
nor other botanical species grounded among the trunks and
occasional poison ivy I find

And the red flowers became blue and the red rose became violet

And I had no name for the red flower
because it were a walk and

only a walk

the creekbed empty of philosophy

the sky empty of philosophy

the path I was walking on

and I had no name for the smell and
continued
to watch the bumbling bee upon the purple
upon

there is a name in a dictionary written
in black and white
describes a color wheel

a pigment
an oil
a brushstroke

I am impressed as well

and to say a color wheel for a spectrum of smell
[another sense to sight and sound]

there were coffee
there were cut grass
there were winter a first exposure

and now
june is a smell

it were a neighbor's garden
basil

Poetics

On the verbal expression of thoughts is

an interpretation and

the distinction of that which is valued for

not every thought presented is poetic and

to ask what is valued in the expression of thought

I have a broad interpretation of poetry

to ask what is valued in the expression of thought

were to the presenter and to the audience

meaningful

nor conversational though a monologic presentation which

is or is not received as presented

in regards to a broad idea of poetry I include

folklore

free verse poetry

shall I include philosophy

shall I include the written presentation of research

mention aristotle mention saint thomas aquinas

value of verbal presentation atween a presenter and an audience

and what form only ie verbal presentation and what form eg written is poetic a poetry published pre nineteen hundred
as published as written nor otherwise to consider

were bakhtin to mention _art and answerability_ the capsule of a completed poetic presentation is answerable only as

Vocation

Were catholic canon were ones desirable way of social existence ie carpenter teacher doctor writer social service

avocation I interpret

the vocationalist on weekends

say ritual

say teleology

and what brings a vocationalist to vocation

on the ordination of those as priests nuns were diploma certification to the teacher eg

and the instruments of vocation itself upon ordination diploma certificate the pen the chalice the reflex hammer the chalk the pencil the saw the toolbox

ones life work

were retrospect

ambition is a question of experience were exposure

If I knew who discovered zero I might ask what there was before

from: Lakeshore in Half Light [last three lines] W S Merwin

I discovered zero when
a plus and minus tables were introduced in an elementary classroom

having realized one

the importance of zero is
<negative>

because of infinity

anthropology

conceptually phonetically etymologically etiologically wherefrom

poly originated

multi architected

supradenominated inhabitants geopolitical subdivided by school district and roof farm typology

the multitudinous containing having been brought or having brought themselves

and an exterior groups to recognize [consider]

anthropology

and were an anthropology to bring a teacher

Speaking slower than sound

Is often misunderstood

shall I repeat myself

a forty five rpm on thirty three rpm or is it thirty three rpm on forty five rpm

sound is audible at seven hundred something miles per hour

mach one and is

vibratory

there is smoke in the air which causes rain

the sound of a raindrop into

a puddle

and to say enlightenment or

the eventual rainbow is a good one

so slow

a goodness

may or may not be heard

The existents are axiologizing again

Is near election

a subtle empty campaign community center

security guards at the metal detectors

a candidate were elected

were the barbershops

were a meetings at a mailboxes neighbor to neighbor

were televised

were a matter of decision when a candidates were introduced

were a matter of noninterest

a candidate were elected upon

majority of

voters

having voted

of one million voters were ten to vote of which six voted for the candidate

The exigencies are axiologizing again

Let me tell you a thing about urgency

by the way I prefer iced tea in the afternoon

about urgency

biscotti [question]

is that a chevy [question]

[crunch]

I have been getting up early all of my life

at age thirty five I started saying _I am an early bird_

I shower

I am out the door

[crunch]

what do you think about urgency [question]

there is something that requires attention

I must write something down

good to chat

I will leave a tip on the table

The student who lectured for sixteen weeks in professor carl rogers' class without noticing professor carl rogers in the second row of the classroom and the ten other students who may or may not have paid attention to the lecturer

The subject of a lecture is very important and

the social environment is very important and

the classroom environment is very important

behind the lectern upon the table both of his hands upon

the thing about psychology is not social psychology and whether to look within or to observe others [in many ways] [and] [with and without permission] to hermeneutically draw a summative approach to a conversation originally and upon such an handshake and ongoing hermeneutics for from a behavioral observational distance a vocabulary a subject a conversational interest cannot be certainly summarised and an ongoing interest is a learning of another individual in a one on one conversational way in which future encounters may begin upon such foundations and an introduction of oneself as ongoing within the same social encounter one on one may begin with one's own appearance to the other and perhaps an handshake and conversation in which one presents themselves appropriately per their own understanding of appropriateness with the person face to face mentioning verbally and nonverbally by way of smile and gesture their own desired interest in which the individual speaking presents their own subject and or their own hermeneutics of an existing subject in conversation

the thing about psychology in regards to behaviorism is an ethical perspective to observation as well as in a consideration of teaching in which positive reinforcement is readily applied with regards to kindergarten through twelfth grade and whether an appropriate behavioral reinforcement is offered and whether were an appropriate behavioral reinforcement acknowledged by the eg seventh grade english student reading george orwell originally and whether the same student were to decline the reinforcement and what becomes of a consideration of a new positive reinforcement for the same student given a new lesson that the outcome of the lesson be in the student's interest

why reinforce that which is not in the student's interest in regards to a lesson or otherwise

the thing about psychology and the classroom is a teacher stands in front

and sixteen weeks

and the ten other students who may or may not have paid attention to the lecturer may have listened

what I understand of carl rogers is he was an esteemed professor of psychology considered an humanist earned his academic credentials from teachers' college columbia university in the nineteen fifties

euphony

On the social and asocial euphorics of polynesia

Were a woman to lift freshwater from a creek with her hands and avoid getting her skirt wet

what euphoria the place

echoes

the sound of water toward and

the canopy nor

wind

to be alone in a forest and to know that one is alone

No catching the sixty four year old woman on the motorscooter

I will wait until she is sixty five and senile

Who has died recently

Because the cars are loud

the conceptual landfill is once again full and time to start another
were a social gathering with a gallon jug of carlo rossi [sp] inwhich
spatio

was invented at one speaking to another to say

the bottle will fall from the table if not moved in due time

the associated fingerpoint whether noticed or not by the intended receiver of the mention of _spatio_ as whispered may
or may not equally mean the carlo rossi [sp] is alright

a pile of spatios may or may not be degregative thus

on occasion

spatios and like concepts are put to the conceptual landfill and

recalled at eg high school reunions

where they go is no newspaper article worthy mention that they be gone is or is not important and

where they go is

elsewhere including a humor once associated with oneself now may or may not associate itself with exterior geopolitics
including an associated sense of having known ie spatio for having experienced spatio as well elsewhere including the
very high school one attended eg twenty years prior now mentioning spatio in its own way

to regard at age eg fifty five one has no modern mention of experience among fifty five year olds is to have no concept
to trash at age sixty

were someone to have died recently such as the pope and only pope I am aware of

the nudge doctor may or may not have mentioned on cnn

in a way understood and colloquial I would not disregard

On the seven continents of the world from what I learned in elementary school

Six are inhabited and antarctica

most are in the northern hemisphere the winter olympics most frequently in the northern hemisphere may be reason

there are plate techtonics in which seismic activity caused my molton lava so many miles underground cause the seven continents to drift

were there once one giant continent as if to look at a map they seem to fit together had they not drifted pangea may or may not be a common geologic name given to the single continent theory before drift were drift to have occurred from a single continent

there is an international dateline in relation to a latitudinal consideration of twenty four hours in a day in which the americas exist in the west and asia exists in the east

the americas are south america and north america two continents

in spain madrid I walked by a building that was an ambassadorial building related to a social relation with the americas

spain is in europe which is connected to asia ofwhich I am unclear of a techtonic plate

australia has a very old indigenous group in an arid climate

the equator is lower to the south in africa than I had originally considered and mediterranean africa is diverse and interests me in relation to the mediterranean ie israel italy greece spain ethiopia casablanca and candles that hang from ceilings and mosques with and without chapels middle africa with animals and the cape of shipping inwhich ships had to go the long way around and not far from antarctica

snow is ten million years old in antarctica and base camps are required

I believe techtonic plates will continue to drift in the next ten billion years until a molton core cools

Signs hit with golf clubs

Signs hit with bullets

a yellow parking sign a golf club one loud clank two am nor other sound around

a country road intersection stop sign and bullet holes riddled

tugboats tug ropes push pull vessels into and out of harbors large engines large propellers as large as the largest vessel

entering and exiting the harbor

tugboat operators go home at night when the scheduled marina vessels have come and gone

them with corporate containers filled with that which is put onto trains then semis then taken to sears and walmart for sale unloaded by them as well

the tugboat sends off and

the special call of the weather and the drifting ship with global positioning system is

Teleology and policy frames

A teleological interest

a question of resources

regarding an interestees of what interest

the open space a bared area one city block

open soil

grass and a park bench

a picnic table

until

a teleological interest including

an electrical box for

a concert

a thought should require

no city ordinance

a policy frame is a land area

a policy frame is city ordinance approval

a policy frame is a period of time such as a one hour time period appropriated by the school district of an english class for a senior high school english teacher to present a lesson

value including us currency is exchanged in teleological completion

land set aside and improved to teleological ends is open to the public eg were the improved land park a city park

Ingredients require form for ideality

That which is included without object though with intent is not receptive to that which receives the ingredients

the representative value of the summative representation as objectified exist as separate as ingredients and without cohesion

an object such as an impression to an audience inwhich a presentation is positively received assumes an entity of parts

it is not an added frame to a completed painting which coheses the painting rather the painting is coheded by the painter and is masterpieced prior to the wall considered frame of the painting and the novel is completed and masterpieced prior to editorial and publishing ends

the ingredients for presentation require a form along a path to the work's completion with naturesque impressionism or novel in mind by the artist for ideality

were it the final completed form to be considered ideality or the ideality inwhich the artist underlies as thought throughout the work's completion

and the audience

ideality is what is presented

ideality in the single objectified work of art is considered with regard to taste and

the critic to consider in regards to the artist's style

Were there underground rivers
